LANGUAGES

German — Native

English — Fluent

CORE SKILLS

AI & AUTOMATION

Claude Code · GPT Codex · Gemini · AI Agents · MCP Servers & APIs · CI/CD Automation

ENGINEERING

Java · Spring Boot · TypeScript · JavaScript · Python · C#

LEADERSHIP & PROCESS

Requirements Engineering · Team Coaching · Scrum & Agile

AVAILABILITY

Available from 01/2027

Rate on request

PERSONAL

HOW I WORK

- Digital nomad, based in Germany
- Works effectively from anywhere in the world

HOBBIES

- CrossFit & endurance sports
- Travel & discovering new cultures
- Photography

Phillip Bösger

AI Developer & Consultant

8+ Years enterprise experience

2–3× faster delivery with AI

40+ enterprise solutions delivered

PROFILE

I understand the problem before I reach for a tool. Eight years of enterprise experience give me the judgement to solve complex problems on my own. AI adds speed and range: I run several workstreams in parallel, deliver more complete tests and documentation, and explore more solution paths, all while keeping sight of what's done, what's next, and where it's headed. I direct AI, it doesn't direct me — same quality I always deliver, just two to three times faster.

WORK EXPERIENCE

Freelance Developer, Consultant & Trainer — 01/2026 – Present

Self-employed (Bösger Digital) · Germany (remote)

StackFuel GmbH · Course author, AI-assisted coding — 10/2026 – 12/2026

- Design and write a self-paced online course that teaches technical B2B teams to code with AI agents (OpenAI Codex): lessons, hands-on exercises and knowledge checks.

avasis solutions GmbH · AI enablement & coaching for Polarion development — 05/2026 – 06/2026

- Coached Polarion plugin developers on the job in AI-assisted development across the lifecycle (concept, root-cause analysis, MCP-based implementation, documentation, tests), with training material on my AI Enablement Hub.

avasis solutions GmbH · Polarion plugin development — 01/2026 – Present

- Develop Polarion extensions with AI toolchains (Claude Code, GPT Codex, MCP servers) wired into the delivery pipeline, so several workstreams run in parallel.
- Built avaCopilot from scratch: an AI copilot inside Polarion that drafts documentation, flags review issues and untangles requirements in real time.

Senior Software Developer — 03/2024 – 12/2025

avasis Solutions GmbH · Nuremberg

- Pushed LLMs and AI agents into the team's daily workflow for code generation, automated review and documentation that actually kept pace with a fast-moving codebase.
- Automated CI/CD pipelines with quality gates, cutting manual effort across development and operations.
- Ran parallel workstreams through AI-assisted processes, collapsing feedback loops that used to need sequential handoffs.

Technical Development Lead — 05/2022 – 03/2024

avasis solutions GmbH · Nuremberg

- Took full ownership of a six-person team across requirements, architecture, development and deployment, with quality and delivery timelines squarely on me.
- Introduced CI/CD pipelines and modern development practices, moving QA and release management off manual processes.
- Advised enterprise clients on system architecture, turning complex requirements into scalable, maintainable solutions.

ALM Consultant — 11/2020 – 05/2022

avasis solutions GmbH · Nuremberg

- Led client projects end to end in medical device development, from initial requirements through delivery.
- Designed and built a complete licence management service inside Polarion from scratch, covering creation, tracking and administration in one solution that simply didn't exist before.
- Built an interactive, Excel-like table component for Polarion — genuinely hard to pull off inside a rigid ALM platform and one of the more ambitious things I've shipped there.

PLM Consultant — 09/2018 – 11/2020

Atos · Fürth

- Built Java plugins and widgets in Polarion ALM for Siemens, getting hands-on ownership of genuinely complex extension work early in my career.
- Set up test automation from the ground up and served as Scrum Master alongside my development work.

Dual Study – Applied Computer Science — 09/2015 – 09/2018

Atos · Fürth

- Built a high-performance C# XML parser for large-scale data processing and shipped an OCR proof of concept that read scanned documents automatically.
- Bachelor's thesis: reference modelling for large-scale Scrum project organisation.

EDUCATION

M.Sc. Computer Science — 2022

TH Georg Simon Ohm University of Applied Sciences, Nuremberg · GPA 1.6

B.Sc. Computer Science — 2018

DHBW University of Cooperative Education, Mannheim · GPA 1.9

Dual study · Atos · Thesis: reference modelling for large-scale Scrum project organisation using Polarion
